Fire Protection Engineering

April 11, 2006

To Whom It May Concern:

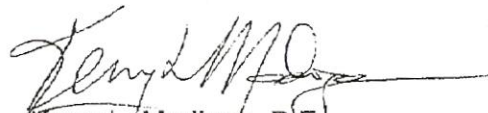

I have been associated with Mr. Greg Kean for the past five years. We met on a professional basis while working on the same design and construction project at the Crown Media Hallmark Broadcast Studios. Our company was responsible for the fire protection design, and Mr. Kean was working in the capacity of Project Manager for the general contractor, Centerre Construction. We have since worked on several projects together at the same facility.

Mr. Kean was an extremely valuable asset on these projects. He has excellent project management and people skills. This was evident in his oversight of the subcontractors, and his solutions to technical challenges. I was especially impressed with his integrity and professional work ethic. He has a genuine concern for giving clients the best possible result he can, and was willing to give his time to work through a number of difficult situations.

I am pleased to offer my recommendation and am very willing to receive any calls on his behalf.

Sincerely,

Scandalciato Design Group, Inc.
